

SOFiSTiK is one of the leading providers of FEA and design solutions for Structural Engineering as well as for corresponding BIM and drafting software based on Autodesk®-platforms like AutoCAD® and Revit®. We also offer a superior project consulting and customer care for our customers and users worldwide.

To strengthen our Customer Service team we are looking for a:

Senior Civil Engineer Customer Service (m/w)

Fields of activity:

- Consulting, support and training for our customers in ongoing projects and in software application inquiries with focus on structural design
- Assistance for the technical sales team, especially for complex structural design inquiries
- Assistance for the product management team

Minimum qualifications:

- Degree in structural or civil engineering (MSc, MEng)
- Minimum of 3 years as a professional engineer in the field of structural or bridge design
- Fluent written and spoken English
- High motivation and good communication skills

Optimal qualifications:

- Advanced knowledge in written and spoken German language
- Knowledge of a third foreign language, like French or Spanish.
- Advanced user knowledge of SOFiSTiK software products.

Being part of our team means:

- Challenging and diversified work
- A safe and attractive workplace within an experienced team
- Performance related salary including attractive benefits

The job is available either in Nuremberg or in Oberschleissheim near Munich.

You may send us your CV and your salary expectations via Email on behalf of Dr. Marin Siffling to jobs@sofistik.de.
